## RAYSGEM

The moment when a ray of light pierced through the gem

RAYSGEM tries to explain a splendid moment. When a ray of light pierced through the gem, both have been magically changed. Light becomes colourfully dreamy, and because of the light, the gem turned to be gloriously bright.

RAYSGEM, that's what we call it.

It's a bang of light and the gem, a collision of technology and luxury, a combination of creativity and life.

From the combination of waterproof technology and display technology, to the development of broad temperature range technology and high brightness, and to the light and mirror panel, RAYSGEM now offers you waterproof TV, mirror TV, kitchen TV, outdoor TV and other high end product including customised design and development. We now can offer you a full range of products with improved luxury of RAYSGEM.

## RAYSGEM team

RAYSGEM is a young dynamic team with core team member being in special TV industry for 8 years. Since 2004, we have designed hand-made bathroom TV for the British aristocratic, in 2006, we updated all mirror TVs for InterContinental Hotel in the United States.

## Vision and Value

RAYSGEM firstly shone out with great brilliancy and explained the meaning of luxury. If the GEM represents quality, then the soul of which is definitely the RAY, which is reminding people of the true meaning of luxury.

### 1.A bang of light and gem

When the most colourful images shows through RAYSGEM crystal panel, you'll understand the meaning of "RAYSGEM". Dedicated in optical display, our development team has been improving both mirror and display at the same time.

### 2. A collision of technology and luxury

If artificial LED light is technology, then crystal panel is undoubtedly luxury. Add crystal of human wisdom to a perfect gem, what do you get? That's also what RAYSGEM's been chasing after! Unceasingly improving the mirror display and light control technology, RAYSGEM also brings the quality of mirror panel to a new level. We find the collision of both can be magical and luxurious.

### 3.A combination of creativity and life

Until now, have you ever had the idea of watching TV during bubble bath? Or have your mirror tell you how to bring out the best make up when you look into it? Or a French chef teaching you how to cook when you are preparing dinner?..... RAYSGEM has done all this by combining creativity and life together. Now people can enjoy life in every possible way.

Excellent product  
for  
the elite and the few

Providing “excellent products for the elite and the few” is the original thought of why we are making waterproof TVs. Think about it, after a long day’s hard work when you are home or after an exhausting journey you are back in the hotel, beside the hot water to wash off the dust from the day, there’s something missing. Is it the news update, popular sitcoms or the daily talk show? Living room TV doesn’t seem to be enough at this moment, and now RAYSGEM waterproof TV makes it all possible for your entertainment in the bathroom.

## Perfect Technology and Excellent Quality

Waterproof TV is the combination of RAYSGEM's 4 core technologies. The latest waterproof technology secures all waterproof TVs from all kinds of harsh environment. Every part of the TV is strictly tested for 90% humidity experiment. MPS display technology and light control combined together, makes the mirror, crystal black and SMART panels come with the best image display and fade-in/out effect. You can have a clear mirror and full-HD display with the same device.

Broad temperature range is a guarantee for stable performance. No matter it's wall mounted or built inside the wall, you won't have to worry about its heat output.

Ultra-thin LED display with digital and analog TV tuner is the core part of a waterproof TV. It comes with multi-functional inputs and outputs to be more compatible with other devices. Now we have AV, HDMI, VGA, rear IR, RS232 and audio output, even RJ45 for you to choose. In conclusion, this waterproof TV model has everything you can think of ready for use.

Simple installation  
and  
perfect user  
experience

RAYSGEM waterproof TV covers all kinds of interior design. It can be installed in the bathroom, kitchen or any other watery environment with no concern of water or vapor intrusion. Waterproof remote control is also designed to be 100% waterproof for daily use. In the meantime, the slim design of the whole TV body is easy to be installed without too much modifications to the house. This model can fit in to almost anywhere without compromising the original interior design.

# APPLICATIONS

04

## In Hotel

### In Hotel

As it turns out, your hotel guests will be disappointed when they check in the hotel and find there's no mirror TV in a 5-star hotel room. St.Regis, Ritz Carlton, Kempinski, InterContinental, Sheraton and even Grand Hyatt have installed mirror TV as standard service. Mirror TV is also a favorite product of designers because of its flexible installation. Mirror TV brings to best design ideas to any kind of decoration.

Replacing the clumsy TV in the hallway and the dining room is a good choice, or at least the designers like to do so. Your guests will remember this stunning design or appreciate the thoughtful service in the hotel while they watch daily shows.

## In Retail Outlets

### In Retail Outlets

What's the best user experience? Perhaps you have designed your own showroom store for your unique product, or maybe you have chosen an supersize mirror TV to play fashion shows in your store. But, in the meantime, you can also use RAYSGEM mirror TV and be more creative, such as a dressing mirror with a bar-code scanner inside, so when customers are trying out, RAYSGEM mirror TV will automatically begin to play out the price, style, details and discount of this item.

Of course, RAYSGEM invites you to more creative ideas.

# In Kitchen

## In Kitchen

What else is missing in your kitchen? An oven? A dish washer? or...a multi-media kitchen! Pick a wall or a cabinet, then install a customised mirror TV to it, after this, you can enjoy all the pleasure it brings. You can watch kitchen shows and sitcoms while preparing the family dinner. Hooked your kitchen TV to a computer, you can play your favorite video and practise millions of recipes. In a word, you are going to love this kitchen TV.

You don't have to worry about greasy fume that might get into the TV, because all has been tested and avoided in design. Cleaning TV will be very simple, just like wiping a glass clean and even simpler.

# In the Hairdresser's

## In the Hairdresser's

When your customers are sitting in front of the mirror waiting for their hair to be done, or when you are trying to recommend a better hair style, aren't you missing anything? Perhaps a mirror TV installed behind the mirror, when the customer is all set, it'll automatically turn on and play all kinds of hair styles or display all your recommended hair products. When the customer finishes watching all info about your store, then you can play all TV programmes which is a easy way to kill the boring hours during the customer's stay.

RAYSGEM mirror TV has a perfect solution and rich experience in "magic mirror" and will continue this legend for you and your customers.

## In Bathroom

Other than waterproof TV, mirror TV seems to be the best choice for bathrooms, or it's the updated version of waterproof TV to put it this way. You can installed it over the sink where you wash your hands and brush your teeth, or in front of bathtub to watch it while taking a bubble bath, or anywhere you want to put a mirror. A mirror is all it needs because all colourful images will show when you press the power button on the remote control.

Currently RAYSGEM has got 15" ~22" standard TV size, and of course there are larger sizes for you to choose as well.

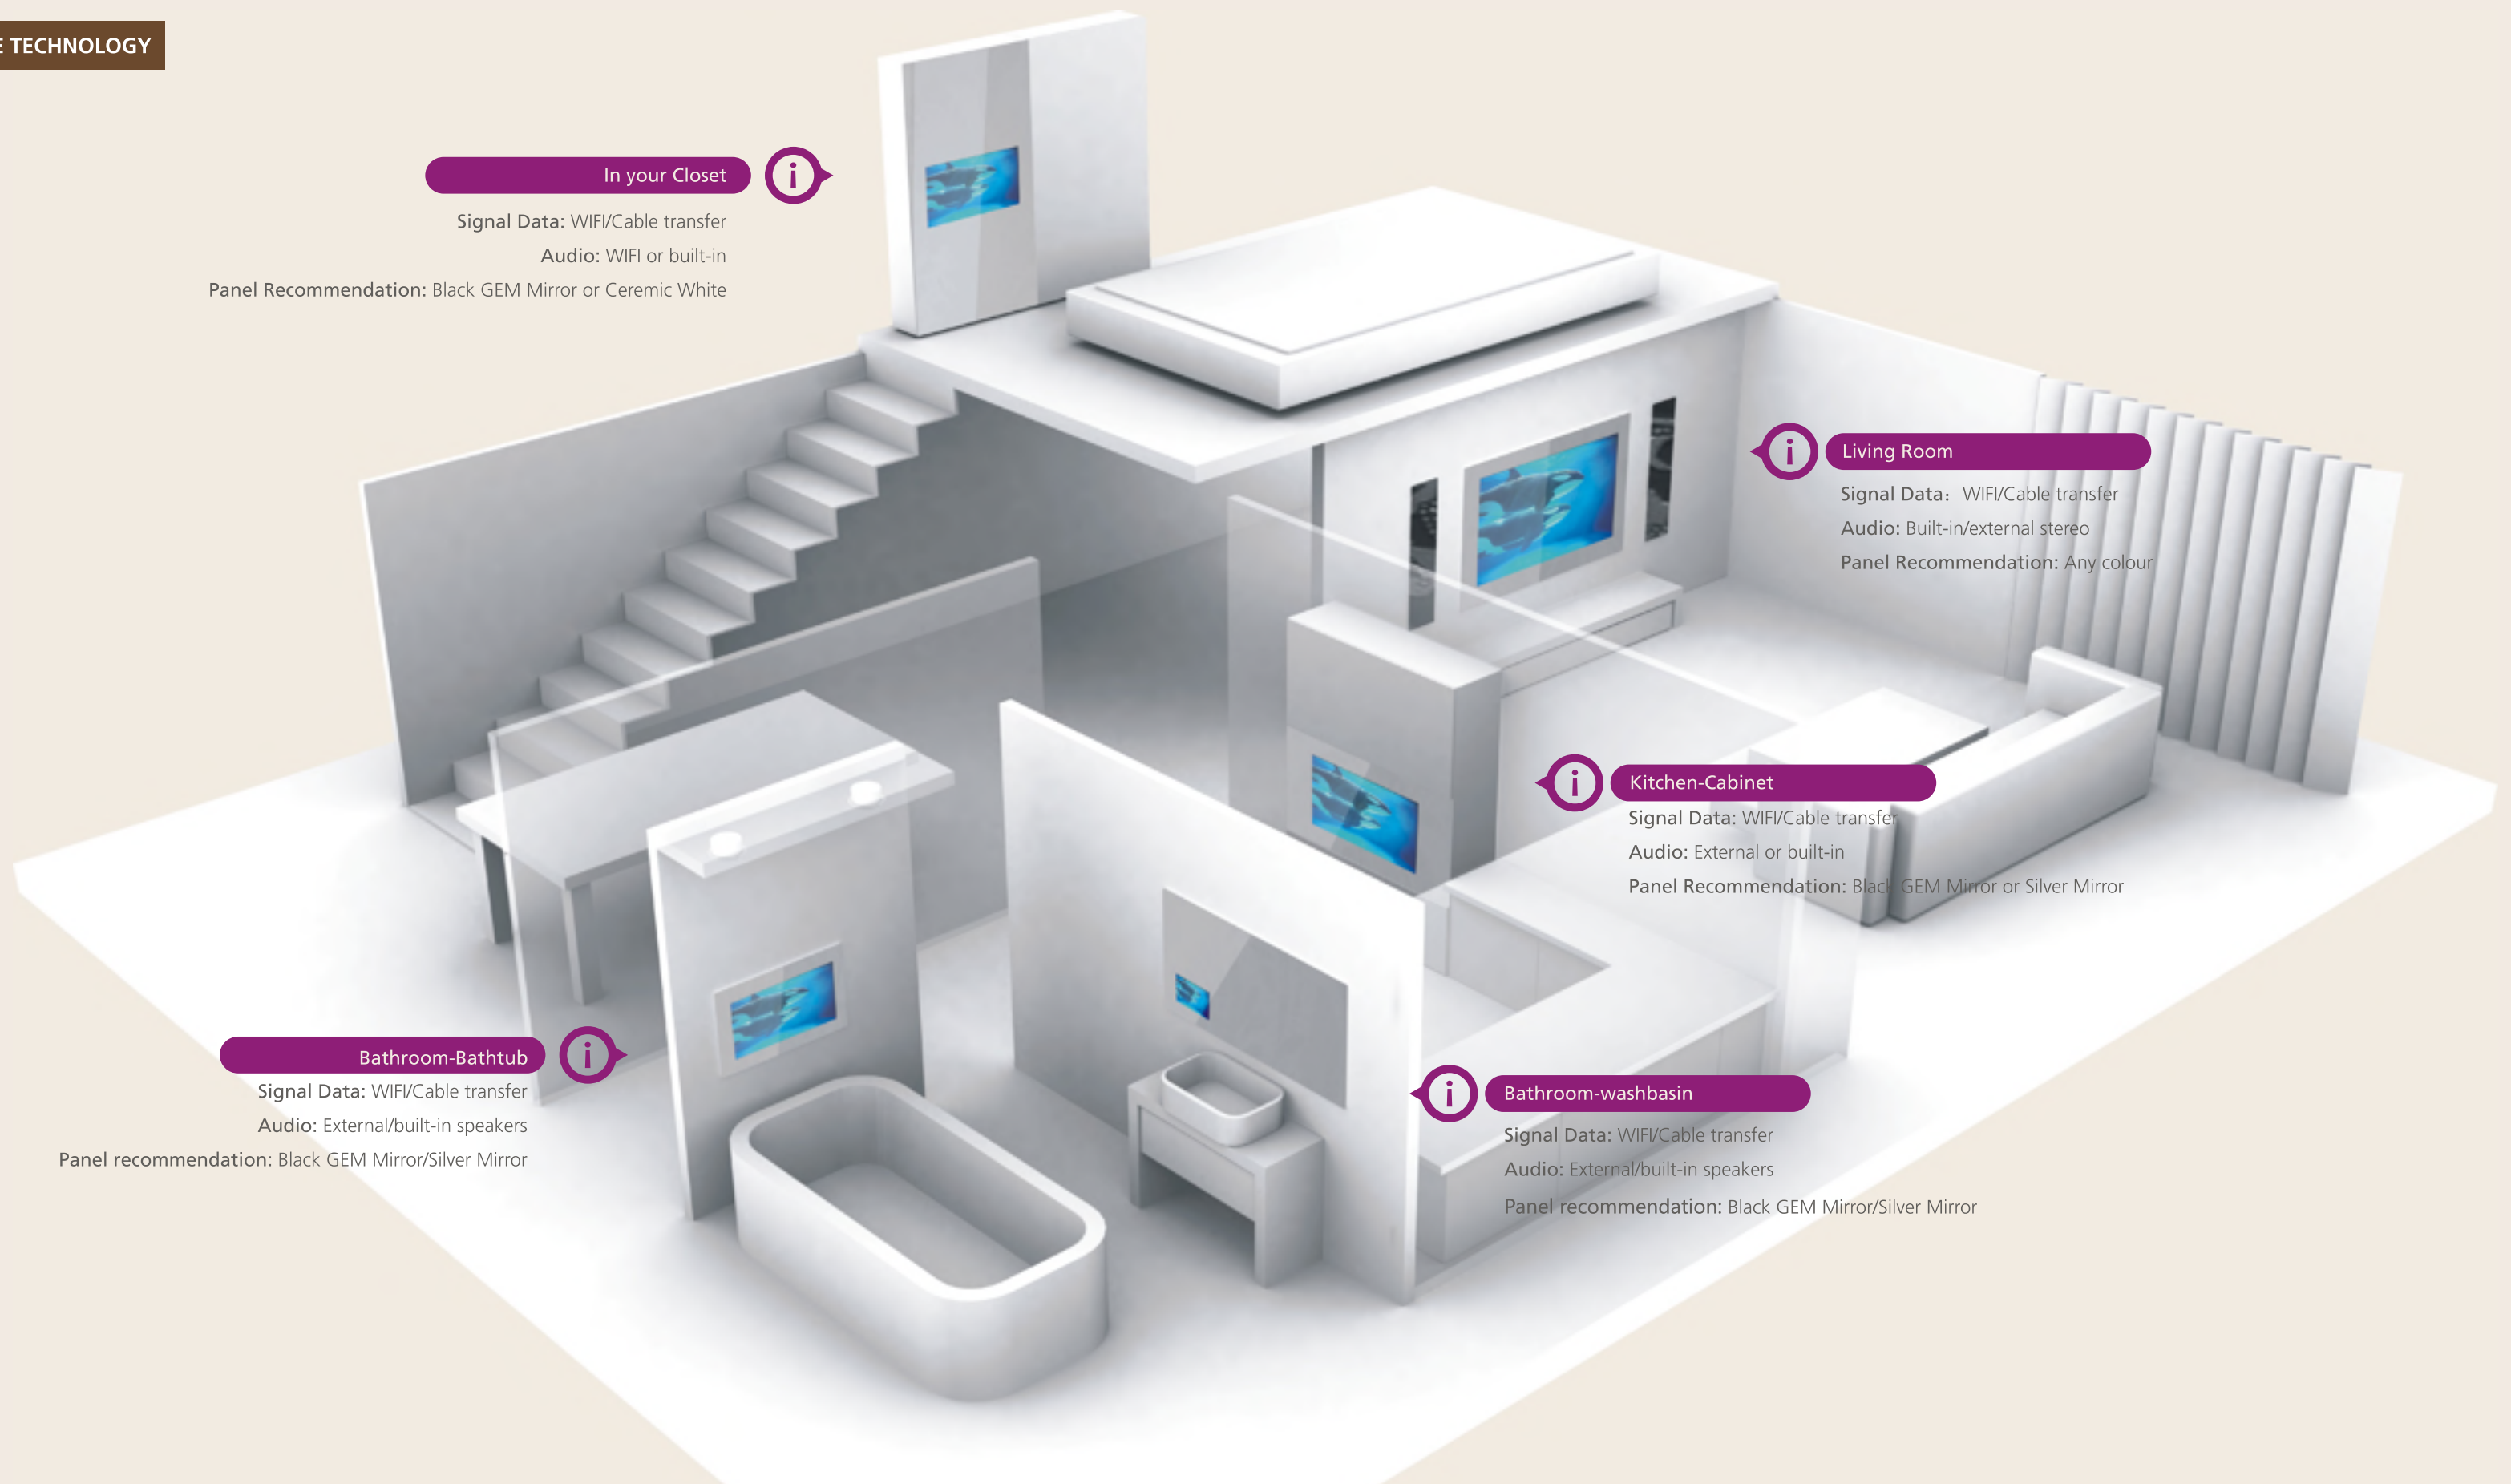

CREATIVE all around!

No design  
is the best design.

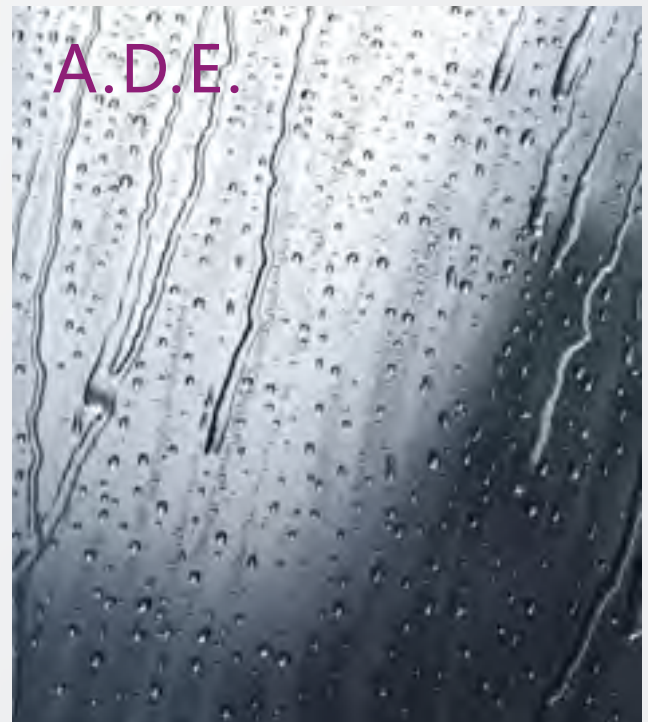

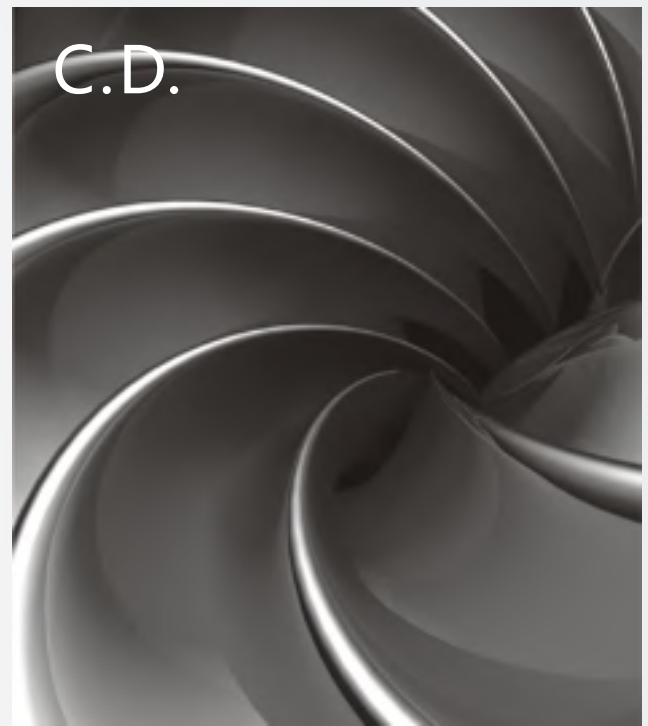

No design can be the best design, or “the luxury of simplicity” if you put it this way. In short, no extra item is allowed in the eye of a designer. A TV is where a TV should be, and you have to consider the whole effect when you fix the TV as the TV itself cannot be redesigned to fit in the room. RAYSGEM’s four core technologies give you a whole new idea of the TV so you won’t have to worry what kind of a TV you should choose, now it can be a wall, a mirror, in your bathroom, kitchen. It can fit in to any interior style and be totally invisible if you want it to be.

## Light-Control Technology

Light control technology uses crystal white glass as base material, through special surface mirror treatment to control the reflectivity and transmittance, now we have super transparent mirror panel with high reflectivity as well. With RAYSGEM MPS display technology, now you can have a more colourful HD image and 100% fade-in effect when the TV's off.

## MPS Display Technology

RAYSGEM's MPS display technology is based on the cutting-edge display technology (Samsung/LG/SHARP) to get a 2nd development, mainly to fit RAYSGEM's light control technology. Automatically adjust light and colour temperature on difference panels, so when the TV's turned off, the display area will be 100% invisible and when turned on, there'll be a perfect HD display.

## Broad Temperature Technology

A regular TV can not guarantee its safety and stability in a sealed or semi-sealed environment. RAYSGEM have optimised the heat control from LED panel, TV motherboard to the TV case through special design. Core parts inside the TV can process high temperature environment so RAYSGEM TV can work under harsh environment. For special projects, RAYSGEM will also implant temperature control system inside the TV to manage temperature initiatively.

## Waterproof Technology

RAYSGEM core team is the beginner of the waterproof idea. From the earlier waterproof glue to later physical waterproof structure until current loop structure with broader temperature range, every improvement means a better and safer product is born. Now the latest waterproof technology is used in RAYSGEM waterproof series, mirror TV series, outdoor TV series and customised products.

## A Franchised Dealership

You have a group of clients with particular requirements

If you are a professional intelligence light electricity service provider, and you have a group of clients with particular requirements, asking for novel products, like waterproof TV? TV in a mirror? or TV that can be watched in the kitchen.....

RAYSGEM provides professional end customer customisation service with creativity to help you and your clients

## B Project Partner

You have a professional design and decoration team

What' s best for your clients?

A “magic mirror” in the hotel bathroom will take off all your fatigue from the journey.

Crystal black wall with built-in display in your villa bathroom takes you to a brighter world.

Your kitchen cabinet will teach you how to make a delicious meal.

Maybe, all above are still not enough.....

Creative all around.

RAYSGEM mirror TV, waterproof TV with full fade-in design will bring you all the luxury you desire

## C Local exclusive agency

You are a brilliant businessman

Distinguish perspectives and sharp insight are your key to success,

then putting a new product to the existing market is your way to extend your local business.

You are a businessman with creativity, and you need an excellent product to bring to your market.

RAYSGEM is looking for local exclusive agents everywhere to share the fortune in the future.

## D Brand Strategic Partnership

You have your own product line,

Multi-media furniture?

Intelligent kitchen solution?

Or more creative bathroom.....

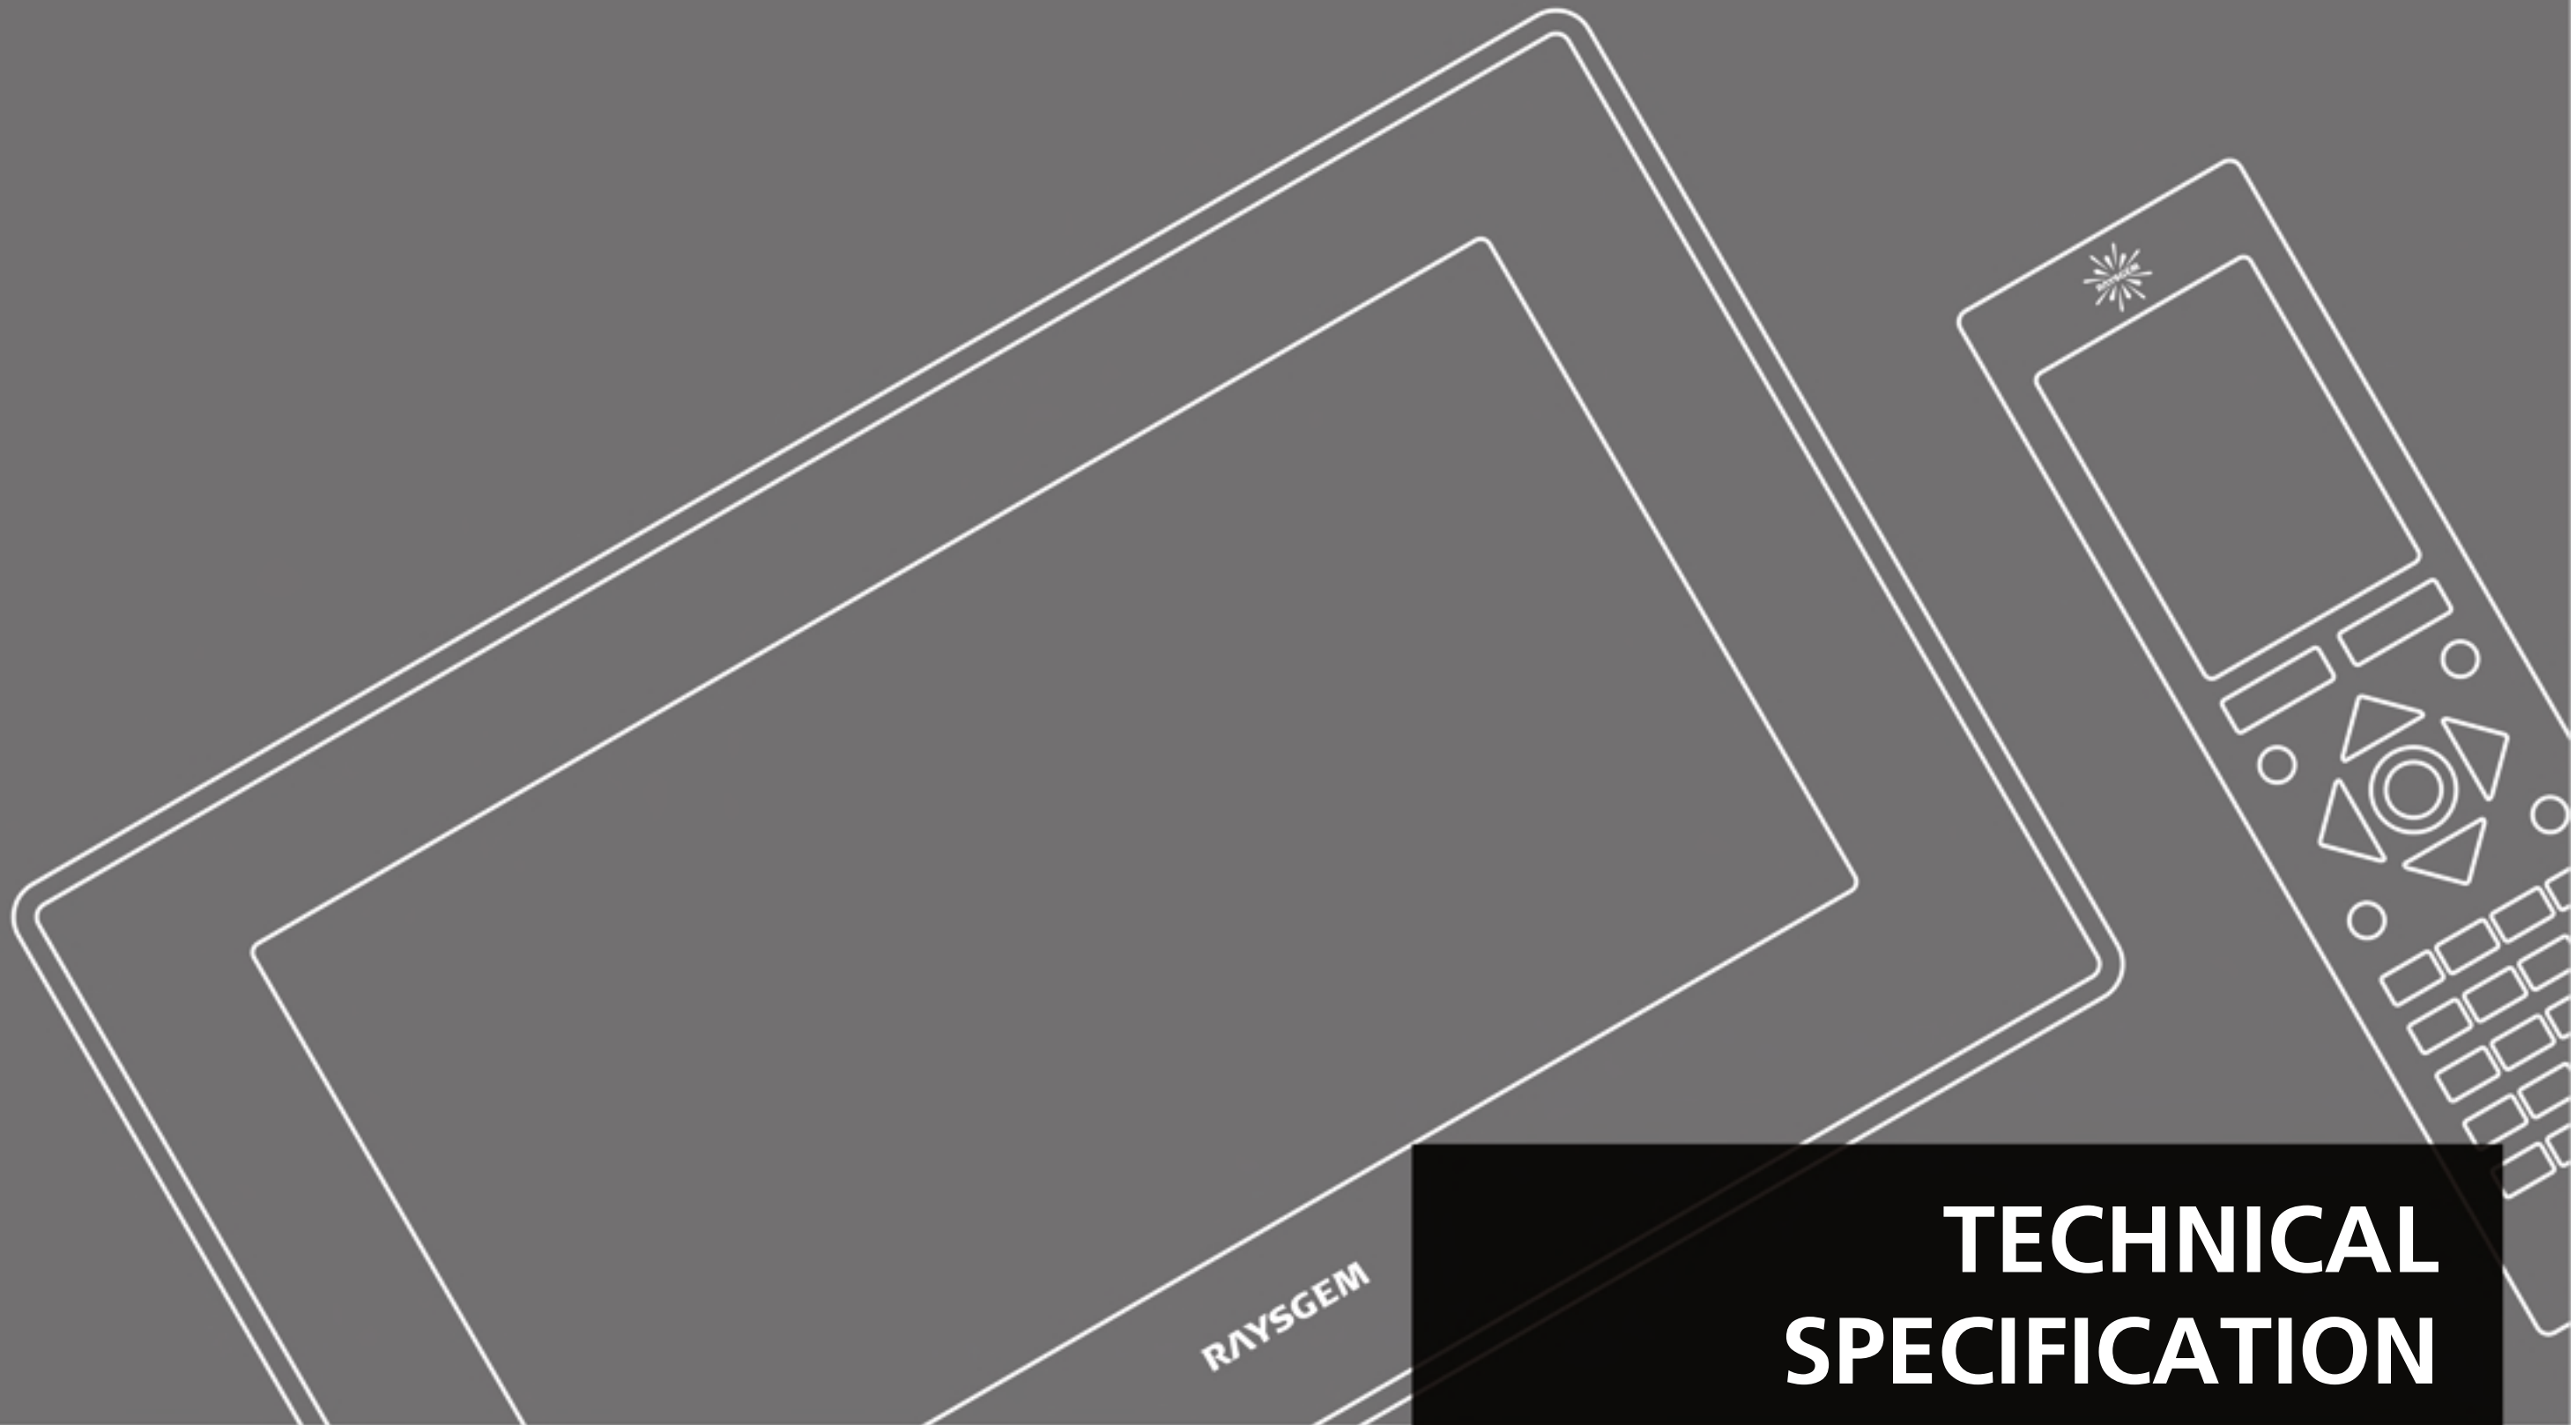

You might want to bring more ideas and concepts into your product,

And also you need more characteristic products to boost brand competitiveness.

RAYSGEM is looking for co-brands to win this market over.
